SOME NEW PROJECTS

CONFEDERATION OF INDIAN INDUSTRIES, AHMEDABAD

STAR BALLS & ROLLERS, RAJKOT

BALAJI WAFERS, RAJKOT

FLUID LOGIC SYSTEMS PVT. LTD, AHMEDABAD

October 31, 2009

We were in need of an innovative and reliable Consultant in order to build new engineering infrastructure facility at Karnavati Engineering Ltd. Nani Kadi. We hire the "SMPS Consultant". They made it possible for us to build one of the best plants in the industry and push the team performance limits even higher.

The "SMPS" made it possible for us to establish the next generation infrastructure project at Nani Kadi. The Customer friendly and flexible approach of SMPS made this project successful without any unpleasant incident. The infrastructure is design in such a way, which make ease to the end users.

I personally proud and impressed by the level of co-operation and service render by SMPS Team to meet our very tight schedules and budgets while providing a quality end product. You have prepared accurate estimate of construction cost, designing and provide excellent communication with KEL Team.

In time to come Professional service organizations also has so many challenges. Personal relationships are critical for creating loyalty toward the customers I think SMPS deserved compliments.

Thank you for the high level of customer service that you have provided me and KEL Team.

We wish SMPS team all success in the years to come.

For KARNAVATI engineering Ltd.

Dear Shri Sukumarbhai
CERA has been associated with SMPS since 1979 when the first bricks were laid for the construction of sanitaryware factory at Kadi. I personally came in contact with SMPS and particularly with you in 1985 when our administrative building "Madhusudan House" was under construction. Since then my opinion about SMPS is very high. The team is of very high caliber, highest integrity and most customer friendly. Shri Sukumarbhai, according to me, is one of the best industrial architects in the country. When earthquake hit Gujarat in 2002, there was not even a single crack visible in CERA administrative building, which itself is a proof of the architectural design of SMPS.

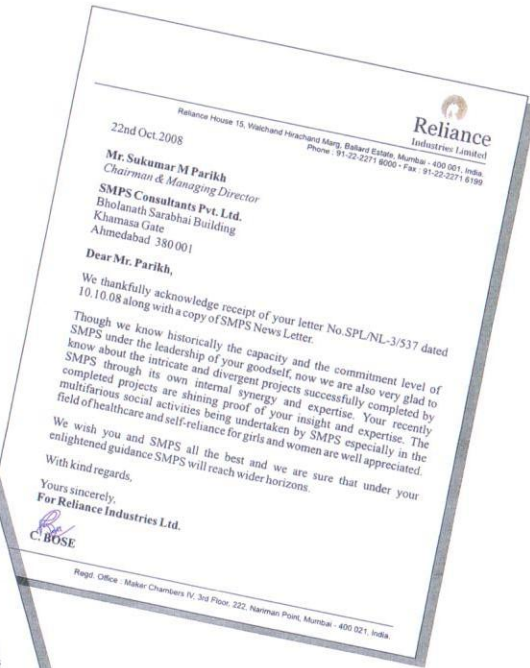

I pray to the Almighty that Shri Sukumarbhai along with his team in SMPS serve the State of Gujarat and the country for the years to come.

With best regards

S C Kothari

WHAT CLIENTS' HAVE TO SAY ABOUT SMPS

SMPS NEWS

Message from Sukumar Parikh

This time around we bring an issue with some vintage photographs. These photographs vividly contrast with the present scene! The ubiquitous Tee Square, the time honoured drafting room's essential tool has all but disappeared from modern drafting rooms, thanks to the omnipresent computer.

And the unique contribution of computers has brought about drastic changes in designing through evermore sophisticated design and drafting tools.

Programmes such as STAAD and AutoCAD are amongst the standard tools, universally adopted and understood and extensively used at SMPS.

Another striking example is the old telephone switchboard - the telephone operator had to plug-in plug-out telephone cords from the junction box. She took phone calls and passed on to the listener and similarly took instructions from a caller to patch-up outside calls, a tortuous process! The modern key telephone makes all these one finger operation.

Other revolutionary change brought in by the internet is too obvious. Gone are the telex-machines (remember them?) and fast disappearing blue print machines. Half an hour wait for each print to develop in an ammonia chamber and an instant print through printers now!

One should then expect far-reaching changes in the future!

Wishing all the readers a Happy New Year.
