TESTIMONIAL

SMPS was only a name we had heard of, when we started the ground work for construction of our Umbilical Cord Blood Banking Unit. However, from our very first meeting, we were taken in by their thorough professional attitude and we had no hesitation in appointing them as our Architectural Consultants.

Shri Sukumarbhai and the entire team of SMPS has been at our beck and call 24 x 7 for the last 8 months and a beautiful 3 storey structure, with a state-of-the-art CLASS 10000 laboratory ready, in record time!! The SMPS team has worked with patience and perseverance with the StemCyte India staff, who could only explain their requirements in a layman's language. Never have they ever been agitated, frustrated or unruffled their feathers; with the innumerable changes made from our side, at the various stages of the designing and construction work.

Today, I can state with confidence that SMPS are the best consultants in civil, structural, architectural, electrical, HVAC and other utilities; in the state of Gujarat. The commitment to their work has raised the bar of this industry and I personally look forward to work with them on future projects.

We are sure SMPS will soar to greater heights and we wish them success for all times ahead.

Asarwa Mills, a leading textile enterprises in the western India, are very happy to congratulate M/s. SMPS to contribute their expertise to different industries in the area of Project designing and implementations.

We have been associated with SMPS since long in our new project and expansion activities. We make this bond of togetherness with SMPS through sharing of knowledge and interaction between engineers.

SMPS have a very talented and skilled group of engineers having updated structural and industrial knowledge to match every field of industries. We enjoy our long association with SMPS in our all new spinning, weaving and textile-processing project.

We wish ten touch the zenith of success in years ahead to come.

Dear Sh. Sukumarji
Received & Read SMPS Newsletter 3rd Issue. While all the activities & bring down wedge shape piece in RCC of 450 mm & weighing Eight metric Tons at a height of 40 ft. in definitely a challenging job. It is heartening to note that SMPS Engineer, with meticulous planning did same.

VIS-A-VIS - our Automotive Sector unit designed and executed under guidance of SMPS is an excellent job done at Rajkot (AVR VALVES PVT. LTD) and I am happy to say that, Dear Sukumarji, Each assignment Completed by your engineers speak for itself and hardly need any testimony. No doubt that you are a national Asset and wish you greater achievements each passing day.

Best Regards

SMPS News

Message from Sukumar M. Parikh

In this issue of SMPS News letter, we take our readers to a tour de force of an attractive array of overhead water tanks designed by SMPS. We never repeat designs – create new ones. Many clients are thrilled to utilize these structures to project their corporate image – as a MAST, so to say.

Also presented are some recently carried out projects at SMPS. This depiction highlights, rather convincingly, the diversity of SMPS's experience and the repository of its competence to handle such complex projects.

As is our wont, we present some aspects of the social responsibilities that SMPS routinely undertakes – blood donation camps, educational efforts to strengthening girls' education and organizing free medical check-up camps.

Some of the children of our Pariwar have made us proud. The achievements of these youngsters are in different fields – sports as well as academics. They will be awarded prizes at SMPS annual function – which should encourage other children to strike out to reach higher goals.

We are also very grateful to receive letters from our esteemed clients. A random selection from such letters is placed in this issue.

We greet all the readers of SMPS News letter.
